It included a cover of David Bowie's classic "Space Oddity" and a rendition of "Sgt. Pepper's Lonely Hearts Club Band." The performance was especially notable because Bowie's bassist, Woody Woodmansey, had died only weeks before. The concert was also the final performance by The Who, whose members were still performing in earnest a few years later. The Grateful Dead was really the first live-music band that showcased full-on jamming, and many of their shows have been bootlegs in recent years. They also pioneered lengthy setlists, giving new meanings to the word "epic." And in case you were wondering, they did play a show in Berlin with Bowie. In the late 1980s, David Bowie and Iggy Pop played a free-for-all in London's Regent Street. Both of them are too big to be missed, but you could argue that Bowie's 1989 performance was even more interesting than Pop's late-career comeback. After Bowie sang a couple of songs by Nick Drake, Iggy played a few songs he loved, including David Bowie's "Heroes." But the jamming made it hard to tell if Iggy was bringing Bowie along, or just enjoying the moment himself. Iggy's performance is likely one of the reasons David Bowie agreed to perform with Iggy Pop in Berlin a few days after this, on June 25, 1989. It's unclear who was influencing the other artists when they recorded "Wish You Were Here." 'Starman' on the cover The cover art of this version of "Starman" is by photographer Linda McCartney, who had been married to the Beatles' drummer Ringo Starr. The flamboyant cover is one of the most memorable aspects of the song. "Starman" a1d647c40b
