"Combined with the revolutionary FIFA Interactive Dimension, FIFA 22 uses a player's real-life position and running style, combined with training-generated data, to help create more realistic gameplay," said Christian Svensson, SVP gameplay & development at Electronic Arts. "We also revisited the controls, which we believe to be the most authentic, accurate and balanced in any FIFA game." For the first time, players now have the ability to control the ball direction in both first- and third-person view by swiping or rotating the right analog stick up or down. Rotation is a simpler and more immersive way to control ball direction compared to tapping a direction on the directional pad. "FIFA is all about control and precision," said Jeff Pobst, Lead Gameplay Designer at EA Canada. "Our goal with FIFA 22 is to further refine the ways in which players are able to control the ball, while at the same time maintaining a true-to-life feel." The Challenge Mode in FIFA 22 has been redesigned to offer more variety than ever before. Five brand new, exclusive game modes and new modes that can be enabled in Career Mode have been added to the revamped "FIFA World," "FIFA Champions," and "Best Shot" modes. "Best Shot" is the most experienced mode in FIFA history. Players are tasked with going through a challenge course filled with 50 footballs that fires at them on command. Players use the analog stick and face buttons to fire and dodge as the ball is a fast, high-speed barrage of pressure. FIFA World is the ultimate test of skill. In this mode, teams must take on a world champion and try to emulate what it takes to be a world champion. The new "FIFA World Power Rankings" feature, displayed in the score and team graphs in Career Mode, is a key part of this mode. The new game feature, "FIFA Fans '94", allows for more than 25,000 fan-created player cards, now known as "FUTI cards," to be stored and accessed from memory in Career Mode. The four new FUTI card slots allow players to add more than 100,000 unique player cards to their game. All of the game modes, including Career Mode, are now faster and more responsive.
