“Motion Capture Technology and the care that’s gone into its implementation in FIFA 22 is unique in the world of football video games,” said Jeff Gerstmann, Creative Director of the FIFA franchise. “FIFA is the longest-running sports simulation video game franchise in the world and it’s still the number one sports video game of all time. The 12-year legacy of FIFA matches the core aspects of the game and allows us to create the ultimate football simulation experience, helping you to represent your club and country with authentic on-field performance and style, in all 32 teams.” Developed in close collaboration with the Professional Footballers’ Association (PFA) and the Premier League, FIFA 22 features the most realistic player likenesses and animations to date. New licensed players have been added, while many existing ones have been revised and updated, including the return of legendary former Premier League keeper Paul Robinson. With a host of new features to make FIFA 22 more immersive than ever, including improved Player Impact Engine (PIE) physics; ball control and handling; and momentum and player acceleration, FIFA 22 will bring the World Cup to life in the most authentic way possible. ## **Features Key:**

- The World’s Game - FIFA 22 features the most realistic, life-like and expansive players’ models to date, with more detail than ever before, including eyeballs, pupils, ear canals and foreheads.
- Getting stuck in - Whether tackling, refereeing, tackling or getting the ball across the midfield, you’ll get stuck in. FIFA 22 features more animations, closer physical contact, and new collision models that lead to more fluid and unpredictable gameplay.
- More ways to play - Futbol Stream, IGN, iGame, iFollow, FIFA Channel, HTC, Sony PSN, Xbox Live, Zee, Resonant Sports and ESPN connect you with football like never before.
- Innovative social features - Feed your addiction with live scores while making connections, voting on player popularity and engaging with FIFA Magazines. Customise your FIFA Network so you can tailor the experience for your FIFA 22 gameplay.

## **Play now - more games to play**

- 
- In FIFA 22, players have the ability to create unique athlete models, aiming to give them a voice that can be heard on the pitch and on the streets.
  - Players' boots can now move with them so that running players follow a natural running gait. The boots can also be used in sprints and change direction during and after a run.
  - The FIFA 3D Cover Vote, which allows players to have an even bigger say in which player they see on their favourite clubs teamsheet, is now available for download.
  - FIFA in the palm of your hand - iOS, Android and Amazon handsets now have access to live daily fantasy games.
  - We are delighted to announce the introduction of a number of FIFA Video-On-Demand (VOD) channels for mobile, including ESPN, beIN SPORTS, Mars TV and FOX Soccer Channel.

## **What's new:**

- **“The Best Move Yet”:** Players have become even more versatile than ever before, with careful refinements to dribbling, shooting and heading. Improved “take-ons” and passes force opponents away from the play, making it more realistic to control game where opposition players can scuttle away from the ball and save themselves from danger. Players also respond to pace and acceleration more naturally: defenders reel away from balls before they’re played, making clear decisions that motivate counter-attacks. Your options are just that much more varied when managing players in Ultimate Team.
- **Strike up a debate:** New skills have increased the ways you can interact with the ball, including starting and concluding dribbles, offloads, and offsides. This means new opportunities to make plays out of the back, with both cross-field and through-ball skills used to find plenty of space. New passes mean better-quality shots, making your teammates more aware of your movements on the pitch so they can find you more effectively.
- **Keen to win:** This year we’re using the Your Club skill to find and purchase items like players, kits, equipment and stadiums. But we’re also improving the game as a whole by making organic improvements that feel as much like playing in real life as

---

**possible. We've tweaked the ball's properties, refined acceleration more realistically, and tuned tactical skills so that you always feel like your performance is improving as the game progresses.**

- **Hustle up a storm: It's more dynamic, more tactical, and more spontaneous than ever in FIFA 22. Defend, attack, wait, and improvise. Intuitive logic and covers team communication throughout Ultimate Team and the game itself, with abilities becoming more frequent and more useful as the game progresses.**
- **New tactics: Choose to play for speed, see-out, shape your passing game, or team up. The options for customising Ultimate Team have never been so diverse, with new skills available to suit each play. Shape your formation around a given selection of tactics, and use game knowledge, preparation, and smart team selection to rise to the top.**
