I need to set a "selectedTodo" property of a class to the value of the passed in listItems variable in the method. I am receiving an error: Property 'selectedTodo' does not exist on type 'ListItem[]'. public selectTodo(listItems: ListItem[]) { this.selectedTodo = listItems[0]; } A: You are getting the error because you are passing the listItems[0] as the arguments to the method which will become the type for the parameter listItems. You need to do this public selectTodo(listItems: ListItem[]) { this.selectedTodo = listItems[0]; } If you want to set this.selectedTodo to the first element of the listItems you need to use the arrow function syntax, also please update the code accordingly public selectTodo(listItems: ListItem[]) { this.selectedTodo = listItems[0] }
