HyperMotion makes players even more intuitive to control as they respond and react to the game like real players would on the pitch. Players are able to make more realistic actions with high speed movements thanks to the game's control method, which allows for more fluid and agile control of players in matches. A variety of new camera angles that include a first-person perspective from an artificial intelligence player's perspective have been introduced, and include an all-new "Torre Perspective," that allows players to see what they are controlling and how their actions affect the game play at a glance. The Torre Perspective also shows players their face in perspective in the HUD, so you can see their expression in the moment. FIFA 22 also features a new "Ultimate Team" Experience that allows fans to construct their own player collections. Create and customise your Ultimate Team with players from across the globe that can be added to squads with a variety of different transfer tactics. As a further evolution, FIFA Ultimate Team now features additional seasonal content such as the recent FIFA 20 Winter Packs and FIFA 20 Desert and Beach Packs. FIFA 22 also includes FIFA Ultimate Team legends and live content in FIFA Ultimate Team, with legendary players such as Pele, Sir Alex Ferguson and Ronaldo to name just a few. Additional content includes the FIFA 20 Community Seasons, a new experience introduced in FIFA 20 that allows the community to come together and create custom FIFA 20 communities that interact with the new league system. In addition, all Champions League™ players and teams in FIFA Ultimate Team and Champions League have been updated to the new Champions League Leagues mode. Leagues are now longer, teams now draft more carefully and many of the rules have been adjusted, which in turn enables leagues to be more accessible for players at all skill levels, with each league providing challenges that are appropriate for players of all levels.
