Technical education in India is now in the middle of the Software revolution. It is a time when the hardware is in advanced stages of development but software development has taken the center stage. There are two ways to learn Java that are very widely used nowadays. The first is the core JAVA training where concepts like objects, methods, literals, classes are covered. The second is the j2ee training which is mandatory for an aspiring programmer to take up the real world projects. Since both the core JAVA and the j2ee training are highly demanded in the IT industry, i.e. the training center helps you to the industry. The price of both the courses varies from well known institutes to small and individual learners who may not be paying much attention to the studies. Hence, we at NareshIT introduce a complete package to learn Java to all learners irrespective of the budget at hand. Come what may. So we have come up with special packages, so if you are really keen on getting trained in Java, you can contact us and avail of these special offers. Java Course : The Java course is an introduction into JAVA. It prepares you for the Java J2EE training. The Java Course is helpful for a learner who wants to practice JAVA in the real world. In this course you will not only be learning fundamental concepts, but also you will be knowing them in detail. The topics which will be covered in the course are : what is Java, what are objects, classes, methods, literals, data types, arrays, data structures, input and output, control statements and other topics in JAVA. Core Java Course : The core Java course will equip you with the basic concepts of Java.
